NEW

"Flat Rocker" actuator for M, A & C-Series Breakers

Carling Technologies' A & C-Series circuit breakers, well known in the industry for their proven reliability, small size and applied versatility, are now available with a new actuator style: ***The FlatRocker.***

This exciting new actuator style reduces the chance of inadvertent actuation or turnoff of the breaker, while also offering great aesthetic appearance.

The "Flat Rocker" is available on products with literally thousands of options relative to voltage, current, interrupt capacity, delay times, terminal options, auxiliary switches and tripping characteristics. Approvals include various levels of UL listing and recognition, VDE, CSA, and are in compliance with all relevant CE directives.

Product Availability: A&C-Series: Standard rocker samples & production quantities available; M-Series & push-to-reset: 2005.
