

# UL Listed - 39 Series MasterINTERFACE - 6.2mm Interface Modules

The 39 Series **MasterINTERFACE** module is a new concept in interface relays from Finder. Ultraslim (only 6.2 mm) available in 5 different models; both EMR and SSR versions; suitable for interfacing with PLC-controlled automated systems.

**FINDER** products have a wide range of quality approvals with great switching performance. Compliant with the CE directive, IEC standards and the RoHS directive. (€

## **39** Series

#### **MasterBASIC**

Module - For general interface use in any type of system and application.

#### **MasterPLUS**

Module with optional fuse holder (093.63) - In addition to the features of the MasterBASIC, the MasterPLUS allows extra protection to the output circuit thanks to the optional replaceable fuse. The main use is to protect the relay output against any accidental overcurrent or short circuit. Replacement of fuses (5x20 mm) is made possible due to the pull-out accessory.

#### Master/NPUT & MasterOUTPUT

Modules allow significant time savings with regards to connection in applications where a single contact closure is required. These models allow a direct connection to the interface without the need for additional terminals, thus saving space in the panel. MasterINPUT modules can be used in interface applications between sensors, contacts or limit switches and PLC input circuits. MasterOUTPUT modules are suitable for interfacing between PLC outputs and relays, motors and solenoids.

### Master TIMER

This module is a multi-function and multi-scale timed interface module. Timer adjustment is via a top mounted rotary knob, accessible after assembly. The MasterTIMER module also accepts 093.63 output fuse holder for guick and easy protection to the output circuit.

our authorized Finder Distributor

### Accessories include:

- 16-Way Jumper links in three different colors: Blue(093.16), Red(093.16.1), Black(093.16.0)

- Separation plate (093.60) for 6.2mm or 1.8mm separation.
- Fuse Holder (093.63)

- MasterADAPTER (093.68.14.1) and 6.5' cable (093.000.20U) allow guick termination from the MasterINTERFACE to the PLC outputs
