(two-pole, 10A)

SU9Z-J5 \$2.00

(5 point jumper)

BC1S-SD0 \$5.00

(screwdriver/spring clamp tool)

SU Series Sockets and Accessories

IDEC Corporation is pleased to introduce the newest members of our celebrated line of sockets, the SU series.

These new spring clamp sockets are available in two-pole or four-pole models and are fully compatible with IDEC RU, RY4, RM2 relays and GT5Y series timers.

The SU2S two pole socket is 10A rated, and the SU4S four pole socket is 6A rated when using a four-pole relay, and 10A rated with a two-pole relay. Each terminal has two wire connection points. SU sockets also use standard hold down spring and clip accessories.

Using the optional jumper, it is possible to connect up to five sockets at the coil terminal. IDEC also offers a screwdriver when using the spring clamp sockets.

Spring clamp terminals save considerable wiring time, and create a highly reliable connection. SU series sockets are DIN Rail and panel mountable (see above, shown mounted with RU series relays).

For further information, please contact IDEC Technical Support at extension 7528.
