

HE2G **Grip Switch**

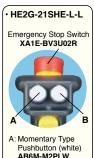

Compact, light-weight grip switch provides a comfortable hold

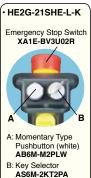

An HE2B enabling switch compliant with IEC/EN60947-5-8 is installed inside the HE2G grip switch.

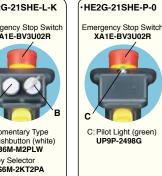

Equipped with different types of control units for various use.

AB6M-M2PLW B: Momentary Type

Internal connector and solder terminals available

Wire-saving internal connectors and solder terminal connections can be selected

Internal Connector Type

Solder Terminal Type

Design

Compactly designed to fit comfortably in the hand

The curbed grip and small-size of the grip switch makes operation comfortable. The light-weight (approx. 140g, HE2G-21SH) and compact size is suitable for operators with small hands and for use in narrow work

Lighter operating force ensures stress-free operation

The operating force required to shift from position 1 (contact OFF) to position 2 (contact ON) is reduced by 50% from that of IDEC's HE1G grip switch. Less operating force ensures stress-free operation for long hours.

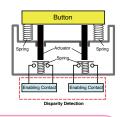

3-position switch with distinctive tactile feedback

A tactile clicking feedback allows easy recognition of switch operation when shifting from position 1 (contact OFF) to position 2 (contact ON).

Safety

Dual enabling contacts ensures high level of safety

The dual enabling contacts with a separate actuator for each contact is IDEC's original structure, which ensures higher level of safety. Disparity detection of a category 4 (ISO 13849-1) level can be achieved by using this switch with a safety relay module or a safety controller.

Actuators with plastic holders applicable for HS5 series miniature interlock switches can be used with HE2G

Actuator with plastic holder (optional) HE9Z-GP15 HS5E Miniature Interlock Switch

When the actuator is inserted, the operation is in automatic mode. When the actuator is removed, the operation is in manual mode.

Types

Contact Configuration								
3-Position Switch	Monitor Switch	Additional Control Units (*1)				Rubber Boot Material /	Wiring Style	Type No.
		Emergency Stop Switch	Control Unit (A)	Control Unit (B)	Pilot Switch (green) (C)	Color	Willing Cityle	(Ordering Type No.)
	With (1NC)	Without				Silicon Rubber / (Yellow) (*2)	Solder Terminal	HE2G-21SH

					With		Solder Terminal	HE2G-21SHE-P-0
		Without	Momentary Pushbutton (DPDT)	Momentary Pushbutton (DPDT)	Without	Silicon Rubber / (Yellow) (*2)	Solder Terminal	HE2G-21SH-L-L
		With (2NC)					Solder Terminal	HE2G-21SHE-L-L
							Internal Connector	HE2G-21SCE-L-L
				Key Selector Switch (DPDT)			Solder Terminal	HE2G-21SHE-L-K
							Internal Connector	HE2G-21SCE-L-K

- *1) Additional control units installed on the HE2G are as follows: Emergency Stop Switches: XA1E-BV3U02R Momentary Pushbuttons: AB6M-M2PLW Key Selector Switches: AS6M-2KT2PA
- Pilot Lights: UP9P-2498G *2) Silicon rubber: Can be used in general factories. Remains flexible at cold temperatures. Suitable in applications in a wide operating temperature
- *3) NBR/PVC polyblend: Oil-proof. Suitable for environments subjected to machine oil and painting robot where silicon rubber cannot be used.

Specifications

Degree of F (IEC 60529		IP67, 66 (without additional control units) IP65 (with additional control units)		
Conditional	Short-circuit current	50A (250V) (Note)

Operating Characteristics

- Terminals NO1-C1/A1-B1, NO2-C2/A3-B3 are outputs of the 3-position enabling
- · The above operation characteristics show when the center of the grip switch button is pressed. Because two contacts are designed to operate independently, pressing the edge of the button turns on one contact earlier than the other contact, causing a delay in operation To avoid this, always press the center of the button.

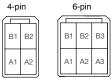

Specifications and other descriptions in this catalog are subject to change without notice.
