

The Wedge Based LED e-Newsletter

WINTER 2006

SunLED introduces The Wedge Based LED. Available in two sizes: 5mm Flat Top version and 10mm Round version. Both packages have been carefully designed to fit as direct incandescent replacements. Varieties of voltages (5V, 12V, 14V & 24V) are available to support numerous applications. These Wedge Based LED lamps are plug-in compatible and can directly replace most major manufactured incandescent bulbs. These rugged packages have been extensively tested to support external conditions such as shock, vibration & heat is experienced with typical push-button switches. Vibrant Colors available: Red, Green, Yellow, Blue & White
