

## INDUSTRIAL KEYBOARDS

A PC/XT, AT and PS/2 COMPATIBLE  
For Harsh Environmental Conditions

p/n 90308-000/0008

p/n 90308-000/0004

**K MOUNT VERSIONS** These full-travel keyboards are specifically designed for 19" rack mounting. With an IP rating of 54, they are impervious to dust and liquid that are often found in industrial installations. The IP rating is achieved by PREH's unique full-travel membrane technology combined with sealed electronics (IP 65). Available in either steel with industrial black finish or brushed aluminum. The aluminum version

is completely enclosed when in the closed rack position. The steel version has friction lock-in and positive detent lockout features. Each keyboard requires only one unit of rack space. Other standard features include 12 reprogrammable function keys, separate cursor keys, positive tactile feel and three year warranty.

p/n 90308-001/0002

**C TOP VERSIONS** These full-travel keyboards have the basic technical specifications and qualifications of the rack mount keyboards described above, except they are designed to be used with industrial computer installations requiring a detached or desk top orientation. They are available in either steel with industrial black finish or brushed aluminum. The aluminum version

has adjustable feet for angle determination and has a 6' straight cord. The steel version has fixed rubber feet to provide the appropriate 11° tilt and comes equipped with a coil cord. Standard features include 12 reprogrammable function keys, separate cursor keys, positive tactile feel and three year warranty.

M-128-WR

p/n 90308-000/0011

**PROGRAMMABLE RACK MODEL** The PREH MODEL M-128-WR is a reprogrammable, reconfigurable, extendable keyboard in a rack mount for industrial locations. Up to 120 characters can be programmed on any single key including control functions (programming

diskette provided). All keytop sizes (1x1, 1x2, 1x3, and 2x2) are interchangeable and easily relegendable. The full-travel membrane technology keyboard has an IP rating of 54 and features positive tactile feel. The M-128-WR requires only one unit of rack space.

**KEYBOARD IN NEMA-4 ENCLOSURE** The PREH Commander 19RN Rackmount keyboard is specifically designed for extremely hostile environments. The keyboard itself has an IP rating of 54 (equiv. to NEMA -12). The all steel, gasketed NEMA-4 enclosure features a

hinged, water-tight door, and rear extension rails for secure mounting. Standard features include 12 reprogrammable function keys, separate cursor keys, full-travel positive tactile feel and 3 year keyboard warranty. Requires only 2 units of rack space.
