

EC50A 50mm Size Ring Type

Large encoder with 37mm inside diameter even takes a small LCD

Typical Specifications

Items	Specifications
Rating	1mA 5V DC
Operating life	40,000 cycles
Operating temperature range	-40°C to +85°C

Notes

- When using an infrared reflow oven, solder may sometimes not be applied. Be sure to use a hot air reflow oven or a type that uses infrared rays in combination with hot air.
- The temperatures given above are the maximum temperatures at the terminals of the encoder when employing a hot air reflow method. The temperature of the PC board and the surface temperature of the encoder may vary greatly depending on the PC board material, its size and thickness. Ensure that the surface temperature of the encoder does not rise to 250°C or greater.
- Conditions vary to some extent depending on the type of reflow bath used. Be sure to give due consideration to this prior to use.
