OPERATION

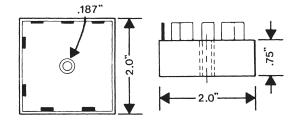

Application of voltage to the input of the timer initiates the OFF time. Upon completion of the OFF time, the load energizes and the ON time begins. Upon completion of the ON time, the load de-energizes and one cycle is completed. This OFF/ON cycling continues until voltage is removed from the input. The OFF/ON time periods are independently adjustable.

Example: TSF-24-ARC-300—Repeat cycle, 24 VAC, external resistor adjustable from 3 to 300 seconds, UL Recognized.

SPECIFICATIONS

TIMING	Virtually unlimited.				
RANGES	See page 77 for standard ranges available.				
OUTPUT	Solid-state, SPST-N.O. 1 amp resistive;				
RATING	1 amp 25VA @ 24VAC				
	1 amp 125VA @ 120VAC				
	.5 amp 125VA @ 240 VAC				
TIMING	Minimum Setting +0 – 20%				
TOLERANCES	Maximum Setting ±10%				
REPEATABILITY	1% maximum; no first cycle effect				
RESET TIMES	Before Time Out 100 mSEC				
-	After Time Out 50 mSEC				
RECYCLE TIME	40 mSEC				
SUPPLY VOLTAGE	24, 120, or 240 VAC, 50/60 Hz; ±10%				
FALSE TRANSFER	No				
DUTY CYCLE	Continuous				
ENCLOSURE	Surface mounted; totally encapsulated with a				
	high quality epoxy for environmental protection				
TEMPERATURE	Operate 32° to 131°F (0° to +55°C)				
RATING	Storage -49° to 185°F (-45° to +85°C)				
TERMINATIONS	1/4" quick disconnect terminals				
WEIGHT	NET: 1.28 oz Shipping: 1.6 oz.				
	* * -				

STANDARD DELAY RANGES AVAILABLE

The chart below shows the standard adjustable time delay ranges available. The part number suffix equals the maximum adjustable delay period of the timer. No letters following the suffix number indicates the delay period in seconds; an M indicates minutes; and an H indicates hours.

STANDARD DELAY RANGE CHART

JIANDAND L	LLAI MANUL	CHANI			
PART NUMBER SUFFIX	MINIMUM SETTING	MAXIMUM SETTING			
010	0.1 seconds	10 seconds			
030	0.3 seconds	30 seconds			
060	0.6 seconds	60 seconds			
100	1 second	100 seconds			
200	2 seconds	200 seconds			
300	3 seconds	300 seconds			
600	6 seconds	600 seconds			
900	9 seconds	900 seconds			
30M	18 seconds	30 minutes			
60M	36 seconds	60 minutes			
90M	54 seconds	90 minutes			
2H	1.2 Minutes	2 hours			
4H	2.4 Minutes	4 hours			
8H	4.8 Minutes	8 hours			
12H	7.2 Minutes	12 hours			
16H	9.6 Minutes	16 hours			
20H	12 Minutes	20 hours			
24H	14.4 Minutes	24 hours			

Longer delays available upon request. Consult Factory

EXTERNAL RESISTANCE SELECTION

On models specified as having the external resistor adjustability feature, the delay period is set by placing resistance across designated pins or terminals. One meg ohm resistance provides the maximum delay on all models. The minimum delay is obtained by jumping the terminals together.

The resistor or potentiometer chosen should be a 1/4 watt or larger.

To determine the resistor value required for a specific time delay, use the following formula:

$$R_{ext} = (T_{des}/T_{max})x 1000$$

R_{ext} = Resistance value required to obtain T_{des} (in K ohms)

 T_{des} = Desired time delay

 $T_{max} = Maximum delay period of the timer$

Example: Model TDC-120-ARC-300; find the external resistance value required for a 240 second delay:

$$R_{ext} = \frac{240}{300} \text{ x } 1000 = 800 \text{ K ohms}$$

"FIXED" DELAY OPTION

Most ATC Diversified timers are available with the delay period factory preset ("fixed") for some specified duration. When this option is ordered, the part number should have an "F" in the Type of Operation designation: and the last digits should specify the desired time delay in seconds (S), minutes (M), or hours (H).

Example: TDC 120-AFA-30M—delay-on-operate, 120 Volts AC or DC, 8-pin octal plug-in package with a 30 minute fixed delay.

■ OFF/ON DELAY TIMERS

Included in ATC Diversified's broad line of timers are six (6) models that feature independent OFF/ON delay adjustments. They are TDF, TDH, TDI, TSF, and TSH. Notice in the ordering information section on each of their respective pages the timing range is specified by a three (3) digit suffix. This indicates that both the OFF and ON delay periods have the same timing ranges. Example: TDF-120-ALA-300: Both OFF and ON delay periods are independently adjustable from 3 to 300 seconds.

In the event that two (2) separate delay ranges would be required, the part number is modified to add a slash(/) followed by three (3) more digits. Since the OFF delay (TI) is first in all models, it is specified first in the part number. Example: TDF-120-ALA-12H/30M: the OFF delay is adjustable from 7.2 minutes to 12 hours and the ON delay is adjustable from 18 seconds to 30 minutes.

NOTE: Combinations of various "types of operation" are available: fixed/adjustable, knob/lock nut, etc. Consult factory.
