

**DIVERSIFIED
ELECTRONICS**

YOUR TRUSTED WATER/WASTEWATER SOLUTIONS PROVIDER FOR OVER 50 YEARS

ATC & Diversified Electronics offers cost-effective and reliable back-up pump control solutions that safeguard your pumps and motors, ensuring uninterrupted and efficient water/wastewater systems.

WATER/WASTEWATER PROTECTION, CONTROL, & MONITORING PRODUCTS

Turn to ATC-DEI for process controls and monitoring for water & wastewater applications that help reduce maintenance costs and maximize efficiencies.

Equipment Protection | Power Monitoring & Control | Remote Process Monitoring

PUMP ALTERNATING RELAYS

We offer intrinsically safe alternating controllers, as well as reliable alternating relays. These products are ideal for lift station and pumping applications.

Intrinsically Safe

ARM Series

ARD Series

ARA Series

PHASE, VOLTAGE & POWER MONITORS

Our single and three phase monitors and models that automatically restart motors after control voltage interruptions provide motor and pump protection. Voltage power monitors help you understand if you are wasting power. All can help you save time and money.

VBA Series

DPR350C

MAR Series

VCFP96M

CURRENT MONITORS

Our current monitors continuously measure and monitor electrical currents, providing multiple protective functions and enhancing system reliability by preventing current-related faults.

CMU100USD

CMU Series

CMG-0100

PUMP & LEVEL MONITORING

We offer products for submersible pumps that provide seal failure and over-temperature protection. We also have level controllers that can kick a pump on/off for pump-up/pump-down applications.

SPM Series

LPC Series

COST-EFFECTIVE REMOTE PROCESS MONITORING & ALERTS

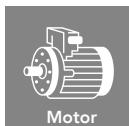

SENSERT™

SENSERT is engineered to monitor sensors in critical processes and provide alerts to the user in numerous environments. Paired with the **MPA2**, you can also access vital motor data anytime, anywhere. This solution can help you prevent major issues, saving you from costly repairs and downtime.
