

#### Features

- Large switching capacity up to 50A
- · Small size and light weight
- PCB pin and quick connect mounting available
- Low temperature rise at full load

## Contact Data\*

| Contact Arrangement | 1A = SPST N.O.        | Contact Resistance        | ≤ 50 milliohms initial |  |
|---------------------|-----------------------|---------------------------|------------------------|--|
|                     | 1C = SPDT             | Contact Material          | AgSnO <sub>2</sub>     |  |
| Contact Rating      | 1A : 50A @ 14VDC      | Maximum Switching Power   | 700W                   |  |
|                     | 1C : 50A @ 14VDC N.O. | Maximum Switching Voltage | 75VDC                  |  |
|                     | : 30A @ 14VDC N.C.    | Maximum Switching Current | 50A                    |  |

## Coil Data\*

## General Data\*

| Electrical Life @ rated load        | 100K cycles, average              |  |  |
|-------------------------------------|-----------------------------------|--|--|
| Mechanical Life                     | 10M cycles, average               |  |  |
| Insulation Resistance               | 100MΩ min. @ 500VDC initial       |  |  |
| Dielectric Strength Coil to Contact | 750V rms min. @ sea level initial |  |  |
| Contact to Contact                  | 500V rms min. @ sea level initial |  |  |
| Shock Resistance                    | 294m/s <sup>2</sup> for 11 ms     |  |  |
| Vibration Resistance                | 10mm double amplitude 10~22.3Hz   |  |  |
| Terminal (Copper Alloy) Strength    | 8N (quick connect), 4N (PCB pins) |  |  |
| Operating Temperature               | -40°C to +125°C                   |  |  |
| Storage Temperature                 | -40°C to +155°C                   |  |  |
| Solderability                       | 260°C for 5 s                     |  |  |
| Weight                              | 35g                               |  |  |

<sup>\*</sup> Values can change due to the switching frequency, desired reliability levels, environmental conditions and in-rush load levels. It is recommended to test actual load conditions for the application. It is the user's responsibility to determine the performance suitability for their specific application. The use of any coil voltage less than the rated coil voltage may compromise the operation of the relay.
