Fixed Shelf & Accessory Rail Adapter *FSRA Series*

Adapter kit for mounting fixed shelves and support angles to combination rack rails while maintaining full load capacity.

Key Features and Benefits

- Heavy-duty 12-gauge steel construction creates a secure mounting surface for fixed shelves and support accessories without reducing their rated load capacity.
- Allows compatible fixed shelves and support angles to be installed on combination rails that do not include traditional front mounting flanges.
- Compatible with Hammond **C4PR** and **CLSR** combination rails.
- Designed for Hammond **RF**, **RZVS**, and **RASC** fixed shelf series, along with **RASA** fixed side support angles.
- Maintains the published load ratings of compatible shelves and support angles, providing a dependable mounting solution.
- Includes four adapter brackets, sixteen 10-32 screws, and sixteen cage nuts for a complete installation kit.
- Finished in a durable RAL 9005 black powder coat for long-term corrosion resistance.
- Manufactured in North America within an ISO 9001 certified facility.
- TAA-compliant.
- RoHS and REACH compliant.

The FSRA Series Fixed Shelf & Accessory Rail Adapter allows compatible Hammond fixed shelves and support angles to be mounted directly to combination rack rails such as the C4PR and CLSR. By recreating the front mounting flange expected by many rack accessories, the FSRA lets customers take advantage of the flexibility of combination rails without replacing their existing shelves or supports.

Manufactured from heavy-duty 12-gauge steel, each kit includes four adapter brackets and all required mounting hardware for fast installation. Designed specifically for Hammond RF, RZVS, RASC, and RASA accessories, the FSRA maintains published load ratings while expanding compatibility across Hammond cabinet platforms.

	Overall Dimensions			Rack
Part No.	Height	Width	Depth	Units
FSRA	1.72	0.59	2.72	1U

Where the FSRA Series Works Best

- C4 cabinet systems.
- C4RR cabinet systems.
- DCZ4 cabinets.
- Cabinets using C4PR or CLSR combination rails.
- Telecommunications rooms.
- Data centers.
- Industrial equipment cabinets.

Best Applications

- Mounting fixed shelves on combination rails.
- Installing side support angles on accessory rails.
- Reusing existing Hammond shelves in cabinets with C4PR or CLSR rails.
- Maintaining accessory compatibility when upgrading cabinet rail systems.
- Supporting non-rackmount equipment inside equipment cabinets.
