Hinged Solid Rack Security Cover *PHPF Series*

Lockable hinged steel rack door panel designed to fully secure and conceal rack-mounted equipment.

Key Features and Benefits

- 14-gauge steel construction provides durable protection and full concealment of rack-mounted equipment.
- Hinged design allows full access to equipment when open, without removing installed components.
- Installs directly to standard 19 in EIA-compliant rack rails for universal compatibility.
- Includes integrated lock and two keys for secure access control.
- Solid steel door design blocks visibility, ideal for security-sensitive environments.
- Door is folded on all sides for increased rigidity and durability.
- Available in multiple sizes (3U, 5U, 7U) to protect different rack sections.
- Provides a clean, uniform rack appearance while securing equipment.
- TAA-compliant, manufactured in North America within an ISO 9001 certified facility.
- Powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The PHPF Series hinged locking rack door panels provide a secure and fully enclosed solution for protecting rack-mounted equipment. Designed with solid steel construction, they block visibility while restricting unauthorized access. With a hinged design for easy service access and integrated locking hardware, the PHPF Series is ideal for environments requiring both security and clean rack presentation in data centers, telecom rooms, and shared installations.

When Another Product May Be a Better Choice

- When you need visibility into equipment while maintaining security, consider our **RMSC** Series.
- When you need to secure larger rack sections, consider our **RSDP** Series.

Part No.	Part No.	Opening Dimensions		Mounting Dimensions		Rack
Black	RAL 7035 Light Gray	Height	Width	Height	Width	Units
PHPF19005BK2	PHPF19005LG2	5.22	16.20	5.25	19.00	3U
PHPF19008BK2	PHPF19008LG2	8.72	16.20	8.75	19.00	5U
PHPF19012BK2	PHPF19012LG2	12.22	16.20	12.25	19.00	7U

Where the PHPF Series Works Best

- Data centers and server rooms
- Telecom and network installations
- Shared or public rack environments
- Security-sensitive installations
- Open frame rack deployments

Best Applications for the PHPF Series

- Securing rack-mounted equipment from unauthorized access
- Concealing sensitive equipment or connections
- Preventing tampering or accidental contact
- Creating lockable rack sections without full enclosures
- Improving rack appearance with solid front coverage
