Key Features and Benefits

- Patented 14-gauge steel rack rail support temporarily holds equipment weighing up to 60 lb (27 kg), allowing a single technician to safely install servers, shelves, UPS systems, NVRs, and other rack-mounted equipment.
- Functions as a "third hand", supporting equipment while mounting hardware is installed to reduce fatigue, improve safety, and simplify one-person installations.
- Tool-free design quickly latches onto front and rear rack rails without screws or fasteners, allowing installation in seconds.
- Available for threaded (10-32 and 12-24), square-hole, and round-hole rack rails, making it compatible with most standard 19-inch EIA rack systems.
- Supports deeper and awkward-to-install equipment while mounting rails or rack screws are secured, helping reduce installation time and workplace injuries.
- Available as a single set (4 supports) or 20-set contractor pack (80 supports) for installers and large deployment projects.
- Durable gray powder coat finish provides long-lasting protection in demanding installation environments.
- Manufactured in North America, ensuring consistent quality, materials, and production standards.
- TAA-compliant, manufactured in North America within an ISO 9001 certified facility.
- RoHS and REACH compliant.

The RRS Series Rack Equipment Installation Tool is a patented installation aid that makes mounting rack equipment faster, safer, and easier. Acting as a temporary support or "third hand," the RRS holds the weight of servers, rack shelves, UPS systems, and other equipment while mounting hardware is secured, allowing many installations to be completed by a single technician.

Compatible with threaded, square-hole, and round-hole rack rails, the tool-free RRS installs in seconds and helps reduce installer fatigue, improve workplace safety, and speed equipment deployment. Manufactured in North America and protected by a U.S. patent, the RRS Series is a simple innovation that solves one of the most common challenges in rack installation.

Are you a contractor, installer or reseller? **Complete our survey to receive a free set of Rack Rail Supports**.

Single Pack Part No.	20-Pack Part No.	Rail Type	Hole Compatibility	Weight Capacity
RRSTR	**RRSTR20**	Threaded Rail	10-32, 12-24	50 lbs (22 kg)
RRSSR	**RRSSR20**	Square Hole Rail	3/8” Square	60 lbs (27 kg)

Where the RRS Series Works Best

- Enterprise data centers.
- Telecommunications facilities.
- Network closets.
- Industrial automation systems.
- Audio/video installations.
- Field service and equipment deployment projects.

Best Applications for the RRS Series

- One-person installation of servers and rack equipment.
- Supporting heavy rack shelves during installation.
- Installing UPS systems, NVRs, and network appliances.
- Reducing installer fatigue and improving workplace safety.
- High-volume rack deployments by contractors and integrators.
