Hook and Loop Cable Straps Pre-Cut 96 Inch *TS Series*

Pre-cut hook and loop cable straps designed for fast, clean cable bundling without the need for bulk spools.

MOST POPULAR

TAA COMPLIANT

RoHS

Key Features and Benefits

- Nylon hook and loop construction provides reusable, non-damaging cable bundling for IT, AV, and network installations.
- Pre-cut 96-inch length eliminates the need for bulk spools and ensures consistent strap sizing.
- Designed for jobsite efficiency, allowing installers to carry and deploy straps easily from tool bags or tool chests.
- Reusable hook and loop design allows quick adjustments without cutting or replacing ties.
- Flexible material prevents over-tightening and protects cable insulation compared to rigid ties.
- Ideal for bundling large cable groups, vertical runs, and rack cable management applications.
- Lightweight and compact format improves portability compared to roll-based solutions.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.

The TS Series hook and loop cable straps provide a practical and efficient solution for bundling and organizing cables in rack and structured cabling environments. Pre-cut to a convenient 96-inch length, these straps eliminate the need for bulk spools, allowing installers to work faster and maintain consistent results across installations.

Unlike traditional cable tie rolls or disposable ties, the TS Series offers reusable flexibility and easy adjustments, making it ideal for dynamic environments where cables are frequently moved, added, or reconfigured.

	Overall Dimensions	
Part No.	Strip Width	Roll Length
TS96	0.50	96.00

Where the TS Series Works Best

- Data centers and IT rooms.
- Network and telecom installations.
- AV and broadcast environments.
- Structured cabling deployments.
- Jobsite and field installations.

Best Applications for the TS Series

- Bundling large cable groups in racks and cabinets.
- Managing vertical cable runs.
- Organizing cables on ladder rack or tray systems.
- Supporting clean and adjustable cable management installations.
- Replacing disposable cable ties in reusable environments.
