3 Accessories

Advantages of the 70-SM Module System

Magnecraft plug in modules are available in many variations allowing coverage for most applications on the market. The Metal Oxide Varistor (MOV) circuit protects by shunting potentially damaging electrical spikes away from the relay coil. The Resistor Capacitor (R/C) circuit snubs back Electro Motive Force (EMF) of relay coil. The Diode circuit protects external drive circuitry from inductive voltages generated when removing coil voltage. Finally, the Light Emitting Diode (LED) circuit is to quickly inform the user when power is present at the coil. All of the plug in modules connect their respective circuits in parallel with the relay coil. No additional wiring is required, and the modules fit within maximum dimensions of relay and socket.

Diode Circuit

Protects External Drive Circuitry from Inductive Voltages Generated when Removing Coil Voltage. Polarity Sensitive.

LED Circuit

LED Status Lamp Verifies that Power is Being Supplied to the Coil. Ideal for Both AC and DC Applications, Polarity Sensitive for DC Application.

**The Complete
System
Solution!**

Modules

Plugging a module into a socket, connects the circuit in parallel with the relay coil. No additional wiring is required. No additional tools are required. The modules fit within the maximum dimensions of both the relay and socket.

RC Circuit

Snubs Back EMF of Relay Coil.

Optimized Size

No Wider than the Socket.

Metal Oxide Varistor Circuit

Protects by Shunting Potentially Damaging Electrical Spikes Away from the Relay Coil. Ideal for AC and DC Applications.

70-SM (A) Socket Modules

Advantages of Using Clips

- **Metal hold-down clips** are ideal for use where high heat or humid conditions are a factor, thus holding their shape and tension. The clips are made of stainless steel and are designed to withstand harsh environments.
- **Plastic ejector/hold-down clips** are ideal in applications where sockets are located in dense or tight areas. These clips allow for quick, safe and firm securing of relays in the sockets with the added benefit that the relay can be ejected with one finger. Plastic clips also aid in keeping operator's fingers away from live circuits. The optional snap-in identification tag allows for custom marking of sockets when used in multi-socket applications.
- **Plastic I.D. clips** are ideal for easy identification of circuits in multi-relay applications. They are designed for labeling and are not ideal for securing the relay in the socket.

The Complete System Solution!

SECTION 3

Stainless Steel Hold-Down Clips made for nearly every application. Ideal for use in harsh environments.

I.D. Clips allow for easy identification of circuits in multi-relay applications.

Newly designed Plastic Hold-Down Clip secures relays firmly and ejects relays easily.

Hold-down clips colored green for better viewing.

Metal and Plastic Clips

- Stainless Steel Clips are Designed to be Corrosion Resistant in Harsh Environments and are Ideal for Use Under Shock and Vibration Conditions.

- Plastic Ejector/Hold-Down Clips are Ideal for Use in High-Density, Multi-Socket Applications.

- Plastic Identification Tag is Perfect for Use in Multi-Socket Applications for Custom Identification of Circuits.

SECTION 3

Characteristics	
Function	16-788C1 A Solid Panel Mounting Base which Adapts to the 70-788EL11-1 Socket and 800 Series Timing, Sensing and Solid State Relays
Mating Socket	70-788EL11-1 (Sec. 2, p.24-25)
Mating Relays	820 Series (Sec. 5, p.4-7)
	831 (Sec. 5, p.8-9)
	841 (Sec. 5, p.10-13)
	861 (Sec. 4, p.6-11)

Characteristics		16-DCLIP-1	16-700DIN
Description		Plastic End Clip with Locking Screw	Extruded Aluminum DIN Rail, 39.37" (1000mm)
Function		Holds Sockets Firmly in Place on DIN Rail	Provides for Quick Installation and Removal of Sockets
Weight		4.5 grams	125 grams

NOTES:
1. THE LIPS AT BASE OF DIN RAIL MAY OR MAY NOT BE PRESENT ON DIN RAIL EXTRUSIONS.

* The 16-700DIN is produced from high strength extruded aluminum and is designed to be a direct replacement for standard 35mm wide DIN rails.

Heat Sink/Class 6 Solid State Relay

Thermal management is a fundamental consideration in the design and use of Solid State Relays (SSRs) because of the contact dissipation (typically 1 W per amp). It is vital that sufficient heat sinking is provided, or the life and switching reliability of the SSR will be compromised. The unique design of the Magnecraft aluminum heat sink maximizes heat dissipation. Available for Magnecraft's panel mount SSRs and ensures reliable operation when properly selected for the specific application. For ease of installation, all mounting holes are pre-drilled and tapped.

6 Series (Sec. 4, p.18-27)

Thermal Resistance vs Power Dissipation

Thermal Derating Curve for 50A CLASS 6 with (70 CFM) FAN

Thermal Derating Curve for 50A CLASS 6 without FAN

User Guide:

The Magnecraft SSR should be firmly mounted on a clean, smooth heat sink surface using thermally conductive or suitable thermal transfer pads.

- Model matches heat dissipation requirements for Magnecraft 6 Series SSRs; up to 50 amps.
- Magnecraft design achieves outstanding thermal efficiency.
- Pre-drilled and tapped to suit Magnecraft SSR 6 Series "hockey puck style" range.

One of the major considerations when using a SSR is properly managing the heat that is generated when switching currents higher than about 5 amps. In this scenario one must mount the base plate of the SSR onto a good heat conductor, typically aluminum; along with utilizing a good thermal transfer medium such as thermal grease or heat transfer pad. Magnecraft's thermal pad eliminates the need for messy thermal grease and simplifies installation with a simple peel-and-stick solution.

Characteristics		SSR-TP-1
Description		Thermal Pad for Class 6 Relay
Function		Eliminates the need for Thermal Grease
Packaging minimum		10 pieces
Used With these Solid State Relays		
Up to 50 Amps		6 Series (Sec. 4, p.18-27)

INSTALLATION:

1. RELEASE LINER ON ONE SIDE OF THE THERMAL PAD, PLACE UNDERNEATH CLASS 6 SOLID STATE RELAY.
2. RELEASE LINER ON OTHER SIDE OF THERMAL PAD AND PLACE RELAY AND PAD ONTO HEAT SINK OR PANEL.

Metal Enclosure/199 Power Relay

BOLD-FACED PART NUMBERS ARE NORMALLY STOCKED

Characteristics	
Description	50-1289-1
Function	Universal Mount Metal Enclosure
Weight	Covers and Protects Relays Approx. 1 lb.
Relays Used With	
199 (Sec. 6, p.2-11)	

1/2" conduit knockouts on each end.
