861 Relay

Description

The 861 is the first complete solid-state relay without any moving parts, all in a slim 17.5 mm design.

Feature	Benefit
Solid-state circuitry	Involves no moving parts, which extends product life, increases reliability, and enables silent operation
Optically coupled circuit	Provides isolation between input and output circuits
Internal snubber	Helps protect the relay's internal circuit from high voltage transients
Internal heat sink	Provides factory-tested thermal management
Finger protected terminals (per IP20)	Help prevent an operator from touching live circuits
DIN and panel mounting	Mounts directly onto a DIN rail or panel, and provides flexibility to accommodate last-minute design changes
