Cherry - Omron	14 - 26
Unimax - Omron	27 - 33

Cross Reference Guide Key

- E = Exact Cross:** Fit, form and function interchangeability with competitor's product.
- S = Similar Cross:** Basic interchangeability with varying characteristics/features as compared to competitor's product. Refer to product catalogs for exact specifications, or consult a local Omron sales office.

While the Omron switches given in this cross reference are considered functional equivalents, dimensions and/or characteristics may vary slightly from those of comparable competitive relays. The final determination as to the suitability of an Omron equivalent for the buyer's purpose shall be the responsibility of the buyer alone. Omron urges that the buyer test and evaluate the Omron switches in the application. All recommendations and technical advice given by Omron are in the nature of opinions and do not create warranties, either expressed or implied, with respect to the fitness of a switch for the application to which it may be put.

Although due and responsible care has been exercised in compiling this cross reference, clerical and typographical errors are possible and are subject to correction without notice.

If a competitor's part number is not found in this cross reference guide, one or a combination of the following exists:

- Insufficient competitor data to cross the part number
- Not a catalog item for competitor and/or Omron
- Omron does not produce that type of switch
