## Coil characteristics

### Operating limits

When the operating coil is in the energized state an operating tolerance of between 85~110% of the coil's rated voltage is permitted, at temperatures up to 40°C at standard operating frequency. Operation out with the above may cause deterioration to electrical insulation and mechanical operation.

### Selections of coil

In CGC-9A~85A contactors, 50Hz coil and 60Hz coil are separated.  
But in CGC-100~800 contactors, the coils are AC/DC common use. (under DC 220V)
