NEMA 1 ENCLOSURES

1100 COVERS

TYPE-1 COVERS, BLANK OR WINDOWED

The 1100 covers are used in conjunction with the **1100 TC**, **1100 DF***, **1100 DF...N*** ou **1100 DER*** bodies, where the control installation does not require a high degree of protection (such as watertight or dust tight), but where a quality enclosure is needed. Covers are made of high quality 16 or 14 GA steel. Covers are available for: hinge flush mounting (1100 HCF), hinge surface mounting (1100 HCFW), hinge surface

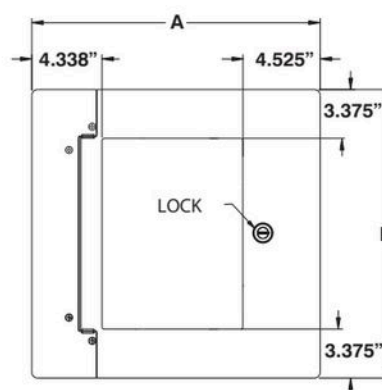

mounting (1100 HCS), windowed hinge flush mounting (1100 HCFW), windowed hinge surface mounting (1100 HCSW), screw cover flush mounting (1100 FCD) and screw cover surface mounting (1100 SCD). The window is made with self-extinguishing polycarbonate. Hinged covers are provided with a bolt-on hinge and are closed with a 1/4 turn key lock, which ensures a

positive door to box contact. Covers are finished with ANSI/ASA 61 smooth gray heat fused powder paint, electrostatically applied on a pretreated base (other colors available). **CSA Certified / UL Listed NEMA/EEMAC 1 / IP30**

* - Field drilling of two holes is required
