

New Products

No.101

Direct from IDEC Corporation

January 15, 2003

- Supports OPC and DDE server technologies
- Analog and discrete I/O support for ONC and MicroSmart PLCs
- No custom drivers or development necessary
- Allows user-defined and dynamic tags
- Connects to unlimited number of IDEC PLCs (depending on license purchased — see below)
- For any questions or concerns, please contact Technical Support at 800-262-IDEC x7526 or email support@idec.com

• Part Numbers and Pricing as follows:

WINDSRV-1	\$195
WINDSRV-4	\$395
WINDSRV-8	\$595
WINDSRV-12	\$649
WINDSRV-U	\$795

Number indicates number of PLCs to link using WindSRV software.

WindSRV Software for IDEC PLCs

IDEC is pleased to announce the newest solution for PLC to PC communication, WindSRV software.

This software acts as a server application for any OPC and DDE compliant Windows software, using RS232, RS485, or ethernet to link it to an IDEC PLC. Once you install WindSRV on your PC, you will have a low-cost monitoring system without purchasing any additional hardware.

WindSRV requires no custom drivers, no extra programming skills, and no special cables. It is a true "plug and play" application, with a demo included on the CD (using OPC, Excel, and the MicroSmart PLC) for easy start-up and troubleshooting.

Linking client applications is simple using an easy-to-follow five-step process. Define the channel object (communication driver), define the device object (PLC), tag the object (user defined and dynamic tags are allowed), select Quick Client to access

your PLC remotely, then follow your completed link to your PC software.

WindSRV-compliant programs include Microsoft® Excel® and Access®, Siemens WinCC®, GE Cimplicity®, Kepware QuickClient, Visual Basic, Visual C++ applications and user interfaces, and any other OPC/DDE compliant program. (For a full list of supported applications, please see the WindSRV brochure, catalog #EP970).

You can connect your PC running WindSRV to as many IDEC PLCs as you like; when you purchase the software, you will buy a license for the number of PLCs you want to access. (WINDSRV-1 allows you to link to a single PLC, WINDSRV-4 up to four PLCs, etc. WINDSRV-U is for any number of PLCs. See chart at left for part numbers and pricing.)

For further information, refer to catalog #EP970, or contact IDEC Technical Support at extension 7528.
