

Product Change

No.111

Directly from IDEC Corporation

July 21, 2003

NOTE: See reverse for replacement information on discontinued models.

- Changes effective immediately.
- No change to list prices.
- New part numbers (see attached chart).
- For any questions or concerns, please contact Technical Support at 800-262-IDEC x7526 or email support@idec.com.

GT3W Series – Dual Time Range Timers

IDEC Corporation hereby announces a part number replacement and consolidation for the GT3W series of dual time range timers.

The updated and enhanced GT3W timers are now simpler and easier to use. The power light on the LED indicating lamp has been changed from red to green and the LED light indicating when output is "on" is now orange, instead of red. The mode setting switch operates separately from the time setting switch, making it easier to distinguish between the two settings. In addition, the two time setting switches are similar to assist the user in programming the time ranges.

The new GT3W timers have standard time ranges from 0.1 second to 6 hours or super models with up to 300 hours, allowing a wide range of timing functions.

The new GT3W timers are now UL-listed, c-UL-listed, and CE marked.

With the new GT3W timers, the graduations are fixed while the pointer rotates, assisting in the ease of setting the timing ranges. You can now choose from eight timing modes to expand the functionality of the timer:

- A: Sequential start
- B: On-delay with course and fine
- C: Recycler and instantaneous
- D: Recycler outputs (OFF start)
- E: Recycler outputs (ON start)
- F: Interval ON
- G: Interval ON Delay
- H: Sequential Interval

Along with the new features, the GT3W timers can be mounted in either sockets or flush panels and have sequential start and independent ON/OFF timing functions.

On the reverse is a list of the old part numbers and their replacements.

For further information, please contact IDEC Technical Support at extension 7526.
