• **Part Number: FC4A-USB**

• **List Price: \$35.00**

USB-to-RS232 Converter

IDEC Corporation is pleased to announce a new USB-to-RS232 cable solution. As most new PCs are now equipped with only USB ports, this package provides a RS232 port connection for "USB Only" laptops and PCs. This allows you to connect IDEC products that require a RS232 connection with an available USB port. No assembly is required, just plug it into a USB port and load the software driver. By using this package you can also add an extra RS232 port without adding an additional RS232 card to your PC.

Requires an IBM PC Pentium 100MHz or higher.

If you need additional information, visit us on the web at www.idec.com/usa or contact Technical Support at 800-262-IDEC (press 2).
